

King's 150 SS BMR

A versatile BMR Sorghum Sudan. Typically used for haylage baleage, greenchop, and grazing. Has a good leaf to stem ratio that provides good quality feed with proper management.

Forage Yield Potential: 4/5

Early Growth Rate: 5/5

Standability: 3/5

Drought Tolerance: 4/5

Leafiness: 4/5

Harvest Management:

Wait until forage reaches at least 18 inches to graze or cut. For best quality and yield, cut when height reaches 24-36 inches. Leave 6 inches of stubble when cutting for fastest regrowth. Condition with a crimper at a slight diagonal to speed drying. Wilt to 50-60 % moisture for storage in bunker or concrete stave silo, 45-55% for a sealed storage system.

Harvest Height:

Grazing—18-24 inches

Hay/Haylage—36 -40 inches

Greenchop—36-40 inches

At A Glance:

- ◇ Dependable summer forage with BMR
- ◇ Can be grazed
- ◇ Good for late summer planting
- ◇ Good leaf to stem ratio
- ◇ Good forage quality

Best Use—haylage and green chop

Establishment—Plant after soils are 60 degrees and rising

Seeding rate:

40-50 lbs/A

Planting Depth:

1-1.5"
