

Balancer Mix

Seeding Rate: 25-35lb/A

65% *Martin II Protek*

20% *Improved early to medium Orchardgrass*

10% *Red Clover OC*

5% *Ladino Clover OC*

With Balanced energy and protein, this high end mixture of grasses and legumes is designed specifically to provide live-stock the nutrition they need to maintain, gain and produce in the northeastern climate. From its base of Martin II Protek Novel Endophyte Fescue to its complementary blend of clovers, this mixture has the best interest of your herd in mind!

Soil Adaptation:

Adapted to many soils

Wet—good. Orchardgrass does not like wet soil.

Drought—Good. Full season performance even during droughty conditions.

pH range: 6.0 and higher.

Cutting Management:

Cut leaving a 3-4 inch stubble height. Orchardgrass yields, re-growth and persistence will decrease with short cuttings. Do not cut short.

Stand life:

3-6 years. This mix has great longevity, and the clovers are very durable.

Traffic Tolerance:

High. All species have a high traffic tolerance.

INGREDIENTS

At A Glance

Uses:

Dry Hay: Fair

Haylage/Balage: Excellent

Intensive Grazing: Excellent

Continuous Grazing: Good

Establishment:

Seeding Rate: 25-30 lb/acre.

Depth: 1/8-3/8 inch

Can be no tilled or seeded conventionally.

Speed: Slow
