

**Wide Adaptation**

**High Yielding**

**Endophyte-Free**

**Cajun II** is a forage-type endophyte-free tall fescue that promises broad adaptation and high yields. **Cajun II** was developed primarily out of selections from Cajun, Martin, and Mozark.

**Wide Adaptation**

This special crossing of “European-type” and “Mediterranean-type” fescues extends **Cajun II**'s range of adaptation and provides it with a wider range of ability to tolerate both the heat and the cold, performing very well both in the Northern and Southern tall fescue zones.

**High Yielding, Early Maturing**

**Cajun II**'s has also been bred to be a high yielder. This is especially noticeable with earlier growth in the spring and extended production in the fall. **Cajun II** is approximately 11 days earlier than Kentucky 31.

**Endophyte-Free, Horse Safe**

**Cajun II** is endophyte-free, meaning it is safe for all livestock including horses.

**Forage Testing**

**Cajun II** has been tested in Tennessee, Kentucky, Pennsylvania, and North Carolina. **Cajun II** has also been tested under the experimental name **FTF 9077**. Completed data is available upon request.

**KENTUCKY TRIAL RESULTS**

Princeton, KY, 2010-21

Variety	Maturity	Tons Dry Matter / Acre		
		2011	2012	2-yr total
KY-31	46.0	2.60	2.26	4.86
<b>Cajun II</b>	<b>54.0</b>	<b>2.34</b>	<b>2.21</b>	<b>4.55</b>
Jesup EF	55.0	2.42	2.13	4.55
