

Enhancer II Alfalfa

Enhancer II is a forage yield leader with an outstanding disease and nematode resistance package. It exhibits high relative forage quality, which will produce dairy quality forage for demanding dairy operations. It has fast recovery and excellent persistence. Enhancer II expresses high resistance to the six major diseases that attack alfalfa.

Agronomic Traits

Bacterial Wilt -- HR

Fusarium Wilt -- HR

Phytophthora Root Rot -- HR

Verticillium Wilt -- HR

Anthracoze (Race I) -- HR

Aphanomyces Root Rot (Race I) -- HR

Northern root-knot nematode -- HR

Stem Nematode -- R

Pea Aphid -- R

Winter Survival and Adaptation

Fall Dormancy -- 4.0

Winter Survival -- 1.6

Stand Persistence -- Excellent

DRI -- 30

At A Glance

Key Features

- Higher forage yield potential
- Improved digestibility for better animal performance
- Drought Stress: Excellent
- Growth Habit: Upright
- Recovery after Cutting: Very Fast
- Fineness of Stem: Fine-Medium
- Leafiness: V. High Leaf to Stem
- Plant Color: Medium Green
- Wheel Traffic Tolerance: Very Good
- Forage Quality: Exceptional
- Crown Depth: Average

Seeding

Seeding rate: 18-22 lbs/A
Seed early spring or late summer.
Best in combination with an annual nurse crop like oats or a perennial grass.
