

Organic Star

Seeding Rate: 25-30lb/A

26% Orchardgrass

30% Perennial Ryegrass

23% Meadow Fescue

8% Red Clover

7% Premium Timothy

6% White Clover

A well balanced grass-clover mixture that is excellent for grazing and baleage. This mixture will handle soil variability very well, although it is designed more for good to dry soils.

Soil Adaptation:

Adapted to variable soils
pH range: 6.0 and higher

Cutting Management:

Cut leaving a 3 to 4 inch stubble height. If stand is cut less than 3 inches, orchardgrass yields, regrowth, and persistence will decrease

Stand life:

With good management and proper soils, stand should persist well for 2-3 years

Traffic Tolerance:

Very good. Meadow fescue & white clover have high traffic tolerance while the other specials have good traffic tolerance.

INGREDIENTS

At A Glance:

Uses:

Dry Hay: Poor

Haylage/Balage: Excellent

Intensive Grazing: Very good

Continuous Grazing: Poor

Establishment:

Seeding Rate: 25-30 lb/acre. Use large seed box

Depth: 1/8-3/8 inch

Speed: Medium. Perennial ryegrass and red clover components will establish quickly.
