

ADV S6504

Sorghum-Sudangrass

ADV S6504 has excellent yield for maturity, and standability. The BMR-6 characteristic offers excellent nutrition for high quality forage that is highly digestible. The photoperiod sensitive characteristic provides an extended window of harvest and consistent quality in the growing season. Outstanding re-growth makes this hybrid a top selection for rotational grazing.

Great for tough drylands with limited irrigation. Highly suitable for No-Till.

Based on Alta Seeds research trials relative to other Alta Seeds products.

At A Glance:

- ◇ Exceptional re-growth after harvest
- ◇ Superb yield potential
- ◇ Extended harvest window
- ◇ BMR-6 provides high quality nutrition
- ◇ High sugar content

Uses:

Dry Hay, Silage, Rotational Grazing.

Establishment:

Seeding Rate: 20-30lb/Acre

Seeding Depth: 3/4" to 1 1/2"

Seeding Dates: When soil temps are 65 degrees and warming, into moist soils.
