

E-Z Dry

Hay Mix

This mixture is designed for the dry baling enthusiasts. Bale dry hay in 3 days or less! No waxy cuticles on the cut hay will contribute to less tedding and raking, making this hay mix a pleaser. This mixture is thoughtfully designed with five components to dry down easy. High yielding Potato Leaf Hopper Alfalfa balanced with Inavale & Echelon Orchardgrass that will persist well. Meadow Brome, which is early maturing but holds quality well and is drought tolerant and persistent. A small amount of early maturing Timothy is also included.

pH range—prefers soils that are 6.0 and higher.

Cutting Management:

Cut leaving a 3-4 inch stubble height.

Stand Life:

With good management and proper soils, This mixture should last a 3-7 years. Consistent early harvest of the alfalfa will shorten the alfalfa stand life, to make it last longer, let alfalfa fully mature.

Traffic Tolerance:

Good. Grasses are more tolerant than the alfalfa.

At A Glance:

Product Formula

27% Meadow Brome

23% KF PLH Alfalfa

40% Orchardgrass (Medium & Late)

10% Timothy (Early maturing)

Uses:

Dry Hay: Excellent

Haylage/Balage: Excellent

Establishment:

Use the large seedbox of the drill

Seeding Rate: 20-30lbs/Acre

Seeding Depth: Shallow -No Deeper than 1/4"

Speed: Alfalfa, and the grasses will emerge quickly.

Grasses are slower to establish but should live long with proper management.
