

# RUE-52

## Grain Sorghum

This ultra early red seeded grain sorghum moves the grain sorghum production zone further north and or opens up the opportunity to follow with winter annual crops and more diverse soil building cover crops. A fungicide application is recommended for this variety.

### Plant Characteristics

Grain Color..... Red  
Standability..... 5  
Plant Height.....42-48"  
Panicle Type..... S0  
Panicle Extention.....5  
Threshability.....5  
Food Grade.....No  
Tannin.....No  
BMR.....No  
Seed Color.....Red

### Maturity/Yield Information

Maturity.....Ultra Early  
Days to Mid-Bloom.....50-52  
Days to Maturity.....85-90

### Disease and Pest Reaction

Anthracnose Resistance.....5  
Sugarcane Aphid Tolerance...3
