OSTSAAT

Crimson Clover

HEUSERS OSTSAAT is also known as "The German Variety", a winter hardy proven German variety that establishes fast and has strong spring yield. A must try for zones 6 and lower. HEUSERS OSTSAAT is a well-established crimson clover variety and an outstanding forecrop. It can be successfully used both for cover cropping and forage mixtures. HEUSERS OSTSAAT establishes a good stand and generates high yields in the first cut. At the same time, it also produces good protein yields.

Crimson clover mixed with a small grain or annual ryegrass during barley to early wheat planting dates makes a great forage and or cover crop mix.

As a cover crop, it can be terminated before summer annual planting with herbicides or moldboard plowing.

Usage: Crimson clover is mainly grown as a cover crop, including However, it is also cultivated as green manure. It has low requirements in terms of soil, is sensitive to black frost and excess strain (trampling).

At A Glance:

Key Features:

- ◇ Flowers are especially attractive to pollinators
- ◇ Can be used for forage or as a winter or spring cover crop
- ◇ Good mass formation after sowing
- ◇ High yield potential in the first cut
- ◇ Low susceptibility to diseases
- ◇ Nitrogen Fixation

Establishment:

Seeding Dates: Late Summer, Fall (Before mid wheat dates) & Early spring.

Seeding Rate: 15-25lbs/Acre

Depth: 1/2"-3/4"

Fine, Firm Seedbed Recommended
