

EasyKeeper

Hay Mix

An easy to dry all grass mix that is great for horses, dry cows, heifers, sheep, goats, and other ruminants not needing high energy. Easy Keeper will have lower carbohydrate and potassium levels due to its higher content of bromes and timothy along with its recommended laxer harvest timing. EasyKeeper will also retain its green color in storage similar to its early maturing sister, EquiFlex.

Cutting Management:

First Cut: Delay until bromes and timothy are headed: This is typically at least 3 weeks later than most other grass species.

Second and Third Cut: Delay until yield is adequate for a good hay harvest. Typically 45-60 days after the previous cut.

pH range—prefers soils that are 6.0 and higher.

Cutting Management:

Cut leaving a 3 inch stubble height.

Stand Life:

With good management and proper soils, This mixture should be long lived.

Traffic Tolerance:

Good.

At A Glance:

Product Formula

35% Succession Hybrid Brome

30% Fojtan Festulolium

15% Timothy

10% Artillery Smooth Brome

10% Barlegro Orchardgrass

Uses:

Dry Hay: Excellent

Haylage/Balage: Excellent

Managed Grazing: After first cutting,
Fair to Good

Continuous Grazing: Not recommended

Establishment:

Use the large seedbox of the drill

Seeding Rate: 35-40lbs/Acre
