

# RE-65

## Grain Sorghum

This early maturing hybrid is an excellent choice for dry areas.

The semi-open panicle has excellent exertion and the large grain threshes very easily. Leaf quality is very good and shows excellent resistance to drought and diseases. Standability is very good because of the stiff stalk and its strong, deep root system.

- ◇ Anthracnose tolerant
- ◇ Good for late planting, double cropping, and dry soils
- ◇ Excellent yield potential

### Plant Characteristics

Grain Color.....	Red
Standability.....	5
Plant Height.....	52-58"
Panicle Type.....	S0
Panicle Exsertion.....	5
Threshability.....	5
Food Grade.....	No
Tannin.....	No
BMR.....	No
Seed Color.....	Red

### Maturity/Yield Information

Maturity.....	Early
Days to Mid-Bloom.....	64-66

### Disease and Pest Reaction

Head smut.....	5
Fusarium.....	5
MDMV.....	5
Downy Mildew.....	5
