

Exceed® PreCoat Pre-Inoculant for Forage Crops

Exceed® PreCoat is a clay-based pre-inoculant which uniformly adheres to the seed without an added sticking agent. The nitrogen-fixing rhizobia bacteria in a clay-carrier keeps the rhizobia viable and eliminates moisture concerns. Exceed® PreCoat allows longer on-seed shelf life and improves seedling vigor with increased root growth and nodule development.

Advantages of Exceed® PreCoat

- Increased yields
- Increased nutrient use efficiency
- Superior seed adhesion

Specifications of Exceed® PreCoat

- On-seed shelf life:

24 Months

Exceed® PreCoat for Alfalfa

Guarantees a minimum of 300 million (3×10^8) viable cells per gram.

18 Months

Exceed® PreCoat for True Clover

Exceed® PreCoat for Alfalfa/True Clover Combination

Guarantees a minimum of 100 million (1×10^8) viable cells per gram.

- Compatible with most fungicide and insecticide seed treatment chemistries
- Compatible with commercial seed treaters

Familiar Packaging

- One 42 lb case of bulk treats 5000# of Alfalfa, True Clover or Alfalfa/True Clover Combination
 - 45 cases per pallet (bag tags included in case)
- Also available in 100# treat size of Alfalfa/True Clover Combination
 - 25 packages per case, 54 cases per pallet, for on-farm application
