

King's 73 MS

Male Sterile Forage Sorghum

A male sterile hybrid with the nutritional benefits of the BMR gene 6 forage sorghum. High levels of sugar and protein due to a lack of grain development. This hybrid offers excellent digestibility and high yield potential. King's 73 MS is known for its high energy that stand out among the rest.

Recommended seeding rate: 80-100k/A.
100-105 days to soft dough direct harvest.

Characteristics & Ratings

Days to Soft Dough: 100-105

Yield Potential: Excellent

Forage Quality: Excellent

Palatability: Excellent

Seedling Vigor: Very Good

Plant uniformity: Excellent

Standability: Moderate

Recovery After Cutting: Moderate

Downy Mildew: Very Good

Anthracnose: Very Good

*Beware of Prussic Acid

At A Glance:

- Male Sterile for High Energy Forage
- BMR-6 Genetics
- Improved Standability

Uses:

Soft dough silage harvest

Establishment:

Seeding Rate: 80-100K

Seeding Depth: 3/4" to 1 1/2"

Seeding Dates: After soils are 60 degrees and rising. Seed into moist soils.
