Fly to New Heights with Aviator

Hybrid Profile

Management Tutor

Ideal Seeding Depth: 1.0 inch

Silage Seeding Rate/Acre: 0.8 units

Grazing Seeding Rate/Acre: 0.8-1.0 unit

1 unit = 1 million viable seed

Seed Date: August - September

Total Nitrogen: 120 lb N /ac

Key Agronomics

Soil Types: all

Forage Yield: very high

Winter Hardiness: very high

Quality: high

Plant Height: average

Straw Strength: very good

Root Development: very large

Ability to Tiller: high

Early Vigor: above average

Pre-head Biomass: very high

Milk Stage Biomass: very high

Very high resistance to diseases

KWS Aviator offers a new standard in early season growth and winter hardiness, making it ideal for maximized tonnage in double cropping systems.
